OBJECTIVE / SUMMARY

Final-year Software Engineering student with a solid foundation in Core Java, Object-Oriented Programming (OOP), and relational databases. Seeking a Java Developer Intern position to contribute to backend system development, optimize core processing workflows, and adapt to high-standard enterprise software development standards. Aiming to develop into a full-time Junior Java Developer.

SKILLS

- Languages: Java (Core, OOP), SQL.
- Backend Frameworks: Spring Boot, RESTful APIs, Spring Data JPA.
- Technologies & Tools: Git, Github, Postman, Maven.
- Database: MySQL.
- Soft Skills: Problem-Solving, Attention to Detail, Fast Learner, Team Collaboration.

EDUCATION

Hanoi University of Natural Resources And Environment

2023 - Expected Graduation: 2027

Software Engineering

GPA: 3.47/4.0

CERTIFICATION

2025 / 2027

IELTS Certificate – Overall Band 5.5

PERSONAL PROJECTS

TASK & WORKFLOW MANAGER **06/2026 - 08/2026**

MAIN DEVELOPER

Description

An enterprise task management web app featuring an interactive Kanban board, Finite State Machine (FSM) lifecycle control, and Spring Security 6 RBAC.

Role

- Built layered RESTful APIs and Thymeleaf UI from MySQL schema design to business logic using Spring Boot 3 and JPA.
- Implemented strict state transition rules (TODO → DONE), optimistic locking (@Version), and BCrypt authentication.
- Wrote automated unit and integration tests with JUnit 5 & Mockito (65 test cases, 100% pass rate).

E-COMMERCE **08/2026 - 10/2026**

MAIN DEVELOPER

Description

A full-stack electronics e-commerce platform featuring GHN Express shipping integration, MoMo payment gateway, dual-mode AI/Admin live chat support, and an administrative analytics dashboard.

Role

- Architected and developed the complete web application from database design to responsive UI with Dark/Light theming.
- Integrated GHN Express API for dynamic shipping rates, automated waybill generation, and real-time webhook tracking.
- Implemented secure checkout flows (MoMo IPN, COD) with transactional stock management and batch order processing.
- Built a real-time customer support system combining Google Gemini AI fallback with two-way admin live chat.
